REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The closest prior art of reference is taught by Kerins et al. (US 6,638,603) in view of Keller et al. (EP 1153987)

Kerins et al. teach a transfer coating method of a hydrophobic material on a carrier substrate to a water-sensitive film (abstract; column 3, line 66 – column 4, line 4). A carrier substrate, such as a release paper, is coated with the hydrophobic material, transferred to a film under heated conditions, and the carrier is removed to leave the material on the film (column 7, lines 33-57). Maximum protection is provided to a surface, by applying hydrophobic particles in a dot pattern so close that the dots touch each other (column 2, lines 50-51; column 6, lines 24-38).

Keller et al. further teach applying a coating onto conventional surfaces, such as textiles, where the coating comprises particles with a hydrophobic surface and a porous structure, to have a completely waterproof surface (abstract; paragraphs 0018, 0053, 0075, and 0121), to reduce adhesion to polar liquids, such as water, and solid deposits, such as dirt (paragraph 0008).

There is no teaching in the prior art of carrying out a transfer coating process of a hydrophobic film on a textile without the use of any adhesive, binder, or adhesion promoter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
